## Top 10 Uses for Vinegar

Vinegar is a safe, clean and easy way to get rid of mold, bacteria and germs. Here are the top 10 ways I use vinegar in my home:

- 1) After regular cleaning with soap and water, I spray vinegar on counters and leave for five minutes to give counters a safe, clean surface.
- 2) Spray in sink after dishes are done. Keeps it fresh and degreases!
- 3) Put in my laundry to increase the cleaning power in addition to Borax.
- 4) Put in my laundry to keep dyes from transferring. (ie. washing new jeans)
- 5) Spray on the bottom of my pots and pans for that last bit of burnt, stuck-on food.
- 6) For those of you with sensitive skin, use vinegar as a fabric softener.
- 7) Just spray inside your toaster oven and on the glass door to get rid of grease and not worry about dangerous residues.
- 8) Drop that toxic Windex, and use your Vinegar for windows.
- 9) When you've just got a few things in your dishwasher, spray a little vinegar in it to keep it fresher until it's time to run it.
- 10) Use as a rinse-aid in the dishwasher to keep dishes and your dishwasher nice and clean.
