

# ConcenTrace® Trace Mineral Drops

*Formulated by Nature for Greater Bio-Electric Health & Body Mineral Balancing.  
For regular or sodium restricted diets.*

**ConcenTrace®** is a natural mineral concentrate extracted from the waters of Utah's Inland Sea, the Great Salt Lake. It is so concentrated that 40 drops (2.5 ml/0.5 teaspoon) equals the mineral content of 120 ml (1/2 cup) sea water with 99% sodium removed. You may expect a wide spectrum of nutritional benefits.

**As a Daily Supplement:** 1/4 - 1/2 tsp (20 - 40 drops), once or twice daily. Mix with any juice or food at mealtimes to mask the concentrated mineral flavor, or take straight, followed with a glass of juice or water. Moderately increased dosages are safe if needed or desired, but larger amounts may have a laxative effect.

**Remineralize** any food or beverage, before or after cooking. By adding **ConcenTrace®** to your food can actually enhance the flavor while reducing the amount of table salt needed.

**Distilled Water:** Adding 5-10 drops per liter (2-4 drops per glass) to distilled, reverse osmosis or purified water not only adds a complete, balanced spectrum of low sodium minerals and trace minerals, but also restores flavor comparable to expensive mineral water at a fraction of the cost.

Because of the high concentration of minerals, at full strength **ConcenTrace®** has no bacterial growth. Due to its supersaturation, however, your **ConcenTrace®** product may experience minor crystalization. This will in no way affect the quality of your product.

**Ingredients:** **ConcenTrace®** (100% pure, concentrated, desalinated Great Salt Lake brine). Contains no other added ingredients.

**20 drops contains:**

Chloride 350 mg.....Magnesium 125 mg.....Sulfate 28 mg  
Potassium 2.5 mg..... Sodium 4.5 mg..... Lithium 0.75 mg

**Plus the following in naturally occurring, varying trace amounts:**

Calcium.....	Titanium.....	Beryllium
Carbonate.....	Lanthanum.....	Selenium
Bromide.....	Cerium.....	Vanadium
Fluorine.....	Barium.....	Dysprosium
Zinc.....	Copper.....	Holmium
Iodine.....	Iron.....	Terbium
Rubidium.....	Silicon.....	Praseodymium
Scandium.....	Yttrium.....	Lutetium
Boron.....	Molybdenum.....	Gadolinium
Phosphorus.....	Tin.....	Samarium
Nickel.....	Gallium.....	Bismuth
Manganese.....	Germanium.....	Ytterbium
Chromium.....	Gold.....	Erbium
Strontium.....	Silver.....	Europium
Cobalt.....	Cesium.....	Neodymium

***Plus all other naturally occurring elements found in sea water.***

PROFESSIONAL USE ONLY
